

ENGINEERING DEPARTMENTS

Mechanical engineering

Civil engineering

Structural engineering

Chemical engineering

Instrumentation engineering

Electrical engineering

Petrochemical engineering

Energy engineering

DESIGNATION ORIENTED TRAINING AND CERTIFICATION

Concept design and development

utility design and development

Process design and development

equipment design and analysis

Detail design and development

Fabrication planning and designing

Shop fabrication design and detailing

Construction planning and design

Transportation analysis and design

Dynamic research & science engineering

Tooling design and development

Moulding design and development

Product design and development

Material science and engineering

Nuclear equipment design and development

Basic training

2D drafting

3d modelling and rendering

Isometrics

Analysis

Design review

Planning

Scheduling

Our Specialization

International codes and standards

Industrial standards

Project working methods

Project coordinates

We provide

suitable designation

Career planning

Placement training
